Spring 2014
HRDg4403 21620 Methods for Teaching Professional Technical Education

(17) Was this course a valuable educational experience? Why or why not?
Yes! I have often complained that many of my courses will be forgotten the minute I pass the class. This one, however, will be with me forever.

It was taught very well and the in person structure for teaching methods was valuable. I have a hard time envisioning how well the online version could function.

For the comment about this being an excellent course, the teacher and student group were excellent, I just don't know if the topic was worth my time other than it was required for a state teaching certificate.

yes the course aimed to make students successful on business life

This course was an extremely valuable experience. Being in a training position, I rarely receive feedback from peers. By taking part in the training sessions in class, I was able to receive peer feedback and identify key areas for personal and professional development.

(18) What aspects of this course contributed most to your learning?

Feedback on teaching.

More insight on the political move of the HRD department and being able to weigh if my degree pursuit is worth continuing.

Seeing myself on video really helped me understand my strengths and weaknesses. It was also helpful and enlightening to be able to provide feedback to my peers and watch them develop through the semester.

no specific thing

(19) Would you take another course from this instructor? Why or why not?

I would most definitely take another course from Vince.

Absolutely. I am sad to hear you let him slip away. Shame on you ISU!

yes, she is well organized

I would definitely take another course from Vince, but unfortunately he needed to move on. Vince had a good down to earth perspective and wasn't caught up in the clouds with his degrees. That can be a challenge with other instructors. With my comment, recognize that this brings out another positive attribute for Vince for he didn't speak negatively about the HRD changes.

(20) If this course utilized any form of technology, please comment on your experience.

There is an online version of this class that I was enrolled in but dropped it for the classroom setting. I highly recommend only offering it in a traditional setting. The online version was horrible.

Our presentations were video taped so we could watch our needed improvements.

no specific thing
